Ordering number:ENN842F

Monolithic Digital IC

LB1290

8-Channel Driver Array

Overview

The LB1290 has been designed for interfacing between low level digital devices and fluorescent display tubes. Its 8-channel independent Darlington output stage is used for digit or segment drivers. Also, with pull-down equivalent resistors, no externally connected resistors are required for ghost prevention. When the input voltage is at a high level, the output gets activated.

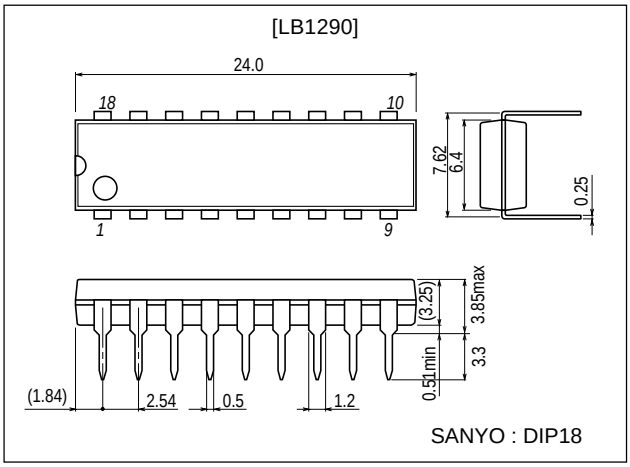
Features

- 8-channel independent Darlington driver.
- Capable of driving digits or segments.
- On-chip sink current circuit for pull-down.
- 55V/30mA rating.

Package Dimensions

unit:mm

3007B-DIP18



Specifications

Absolute Maximum Ratings at Ta = 25˚C

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	V_{CC} max		–0.3 to +55.0	V
Output supply voltage	V_{OUT}		–0.3 to V_{CC}	V
Input supply voltage	V_{IN}		–0.3 to +20.0	V
Maximum output current	I_{OUT}		30	mA
Allowable power dissipation	Pd max		1.13	W
Operating temperature	Topr		–20 to +75	˚C
Storage temperature	Tstg		–40 to +150	˚C

Allowable Operating Ranges at Ta = 25˚C

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage	V_{CC}		4.75 to 55.0	V
Input high-level voltage	V_{IH}	I_{OUT}=–30mA	2.6 to 20.0	V
Input low-level voltage	V_{IL}	I_{OUT}≤–30μA	–0.3 to +0.3	V
